

Thabre Alam Shahul Hameed A

Electronics and Communication Engineering Student

+91 9003323682 | thabrealamsha@gmail.com | [LinkedIn](#) | [Portfolio](#)

EDUCATION

B.E. Electronics & Communication
University College of Engineering Trichy
2023 – 2027 | CGPA: 7.93

Higher Secondary (12th) St. Joseph's
College Hr Sec School, Trichy Percentage:
86.5%

SSLC (10th) St. Joseph's College Hr Sec
School, Trichy

SOFT SKILLS

- Team Player
- Adaptability
- Self-Discipline
- Active Listener
- Multitasking & Punctual
- Responsible & Resilient
- Public Speaker
- Confident in training and technical presentations

TECHNICAL SKILLS

- **Languages and Libraries:**
Python, Pandas, NumPy, Matplotlib, Seaborn, SQL, Flask, ML Models, C, MATLAB, Verilog HDL, Embedded C, HTML
- **Tools & SW:**
Xilinx Vivado, Xilinx ISE, ModelSim, MATLAB, ProteusVSM, Keil, GNUradio, Anaconda, VSCode, GitHub, Vercel, CANoe, Microsoft Excel, Microsoft Power BI, Microsoft SQL Server Management, MYSQL
- **Core Domain:**
Circuit Design & Simulation
- **Data analytics skills:**
Data cleaning, Data Manipulation, EDA – Exploratory Data Analysis, Data Visualization, Data Extraction, Prediction using ML Models

LANGUAGES

- Tamil (Native)
- English (Proficient)

PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate with a strong foundation in VLSI Design, Embedded Systems, IoT, Analog and Digital Circuit Design, Digital Signal Processing, and hardware-based system development. Hands-on experience through internships and academic projects involving digital circuit design and simulation, Digital VLSI design, FIR low-pass filter implementation using Distributed Arithmetic, and image processing-based embedded applications.

Passionate about Data Science using Python, with skills in data pre-processing, analysis, visualization, and machine learning. Adept at combining engineering problem-solving with data-driven approaches to develop practical solutions and derive meaningful insights from complex datasets.

INTERNSHIP

India Space Lab Summer Internship & Technical Training Program 2026

India Space Lab (Online) | June 2026 – July 2026

- Completed technical training in Advanced Drone Technology, CanSat, CubeSat, Rocketry, Remote Sensing & GIS, and Disaster Management.
- Participated in expert-led sessions and project-based learning on emerging space technologies.

On-The-Job Training – Data Analytics

VDart Academy | June 2026 – July 2026

- Performed data pre-processing, analysis, and visualization using SQL and Python.
- Worked with Pandas, NumPy, Matplotlib, and Seaborn to analyse datasets and generate insights.

Internship in Design and Analysis of Digital VLSI and FIR Low Pass Filter Implementation using Distributed Arithmetic

National Institute of Technology, Tiruchirappalli | January 2026 – February 2026

- Designed and simulated digital circuits using Verilog HDL and Xilinx Vivado.
- Implemented and analysed a FIR Low Pass Filter using the Distributed Arithmetic technique.

On-The-Job Training – Data Analytics

VDart Academy, Tiruchirappalli | July 2025 – August 2025

- Cleaned and organized datasets using Microsoft Excel.
- Designed interactive dashboards and reports using Power BI and Excel.

Internship in Analog and Digital Circuit Design and Simulation

National Institute of Technology, Tiruchirappalli | January 2025 – February 2025

- Designed and simulated analog and digital circuits using Proteus VSM.
- Analysed circuit performance and validated simulation results.

PROJECTS

FIR Low Pass Filter Implementation using Distributed Arithmetic

Tools: Xilinx Vivado, Verilog HDL

- Designed and implemented a FIR Low Pass Filter using the Distributed Arithmetic technique in Xilinx Vivado.
- Verified functionality through simulation, timing analysis, and performance evaluation.

Tech Dining System

Tools: Design Thinking

- Developed a sustainable dining management solution using Design Thinking methodologies.
- Designed user flows and service prototypes to improve ordering efficiency and reduce food waste.

Vehicle Number Plate Detection System

Tools: Embedded Systems, Image Processing

- Developed an automated system to detect and recognize vehicle registration numbers.
- Integrated image processing with embedded hardware for vehicle access control and monitoring.

Sales Analysis Dashboard

Tools: Microsoft Excel, Pivot Tables, Pivot Charts, Slicers

- Built an interactive dashboard to analyse sales performance, customer demographics, and product trends.
- Cleaned and organized data to generate business insights through dynamic visualizations.

Student Start-up Analysis Dashboard

Tools: Power BI, Power Query, DAX, Data Modelling

- Developed an interactive Power BI dashboard to analyse start-up projects, funding, and innovation metrics.
- Transformed data using Power Query and created DAX measures to track key performance indicators.

AI Job Market Analysis Dashboard

Tools: MySQL, SQL, Power BI, Power Query, DAX

- Pre-processed AI job market data using SQL and developed an interactive Power BI dashboard.
- Visualized salary trends, hiring patterns, and in-demand skills through KPIs and interactive reports.

CERTIFICATIONS

- NPTEL – Introduction to Machine Learning (Elite Certification) – Secured 61%.
- Completed the IoT and Robotics Workshop at Sona College of Technology, Salem (March 2026).
- Completed the BIT2CHIP: Making RTL Real on FPGA Using Vivado Workshop at PSG Institute of Technology and Applied Research, Coimbatore (February 2026).
- Completed the SNAP ON CHIP – Image Processing Workshop sponsored by Qualcomm at NIT Tiruchirappalli (February 2025).

ACHIEVEMENTS

- Best Paper Presenter Award at the International Multidisciplinary Conference MCKSHPS 2026 for the paper "Smart Education Technologies using Recommendation System", with publication in the conference proceedings.
